Ms. Melissa Arcaro Burns Ms. Jill Fallows Macaluso

Ms. Cheryl Makopoulos, Vice President

Ms. Danielle Miller

Mr. Maurice Weeks

Ms. Lauren Romano

Administration

Mr. Joe Bollendorf, Interim Superintendent of Schools

Dr. Karen Benton, Director of Curriculum, Instruction, & Innovation

Dr. David Tate, Director of Special Education

Ms. Carole Butler, Director of Human Resources & Diversity

Mr. Jeffrey Arey, Director of Educational Technology

Mr. James Heiser, Business Administrator/Board Secretary

Principals

Mr. Andrew Seibel, Moorestown High School

Mr. Matthew Keith, William Allen Middle School

Ms. Susan Powell, Moorestown Upper Elementary School

Ms. Michelle Rowe, George C. Baker School

Mr. Brian Carter, Mary E. Roberts School

Ms. Heather Hackl, South Valley School

Supervisors of Curriculum and Instruction

Ms. Jacqueline Brownell, Language Arts & Media K-12

Ms. Julie Colby, Mathematics K- 12

Mr. Shawn Counard, Athletics, Physical Education/Health K-12

Ms. Kat D'Ambra, Guidance K-12

Ms. Leslie Wyers, Special Education Pre-K – 6

Mr. Francisco Santiago, Special Education 7 – Post Graduation

Mr. Gavin Quinn, Science K-12

Ms. Roseth Rodriguez, Social Studies & World Languages K – 12

Ms. Patricia Rowe, Visual & Performing Arts, Technology & Engineering, Business K-12

Ms. Leslie Wyers, Special Education Pre-K − 6

Course Description and Fundamental Concepts

AP Physics 1 is an algebra-based full-year course that is the equivalent of a first-semester introductory college course in algebra-based physics. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: kinematics, dynamics, circular motion and gravitation, energy, momentum, simple harmonic motion, torque as well as rotational motion.

Inquiry-based laboratory experiences support the AP Physics 1 course by providing opportunities for students to engage in the seven science practices as they design plans for experiments, make predictions, collect and analyze data, apply mathematical routines, develop explanations, and communicate about their work.

New Jersey Student Learning Standards (NJSLS)

Subject/Content Standards

Include grade appropriate subject/content standards that will be addressed

| Standard # | Standard Description | |
|------------|--|--|
| HS-PS1 | | |
| HS-PS1-1 | Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms. | |
| HS-PS1-2 | Construct and revise an explanation for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties. | |
| HS-PS1-3 | Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles. | |
| HS-PS1-4 | Develop a model to illustrate that the release or absorption of energy from a chemical reaction system depends upon the changes in total bond energy. | |
| HS-PS1-5 | Apply scientific principles and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs. | |
| HS-PS1-6 | Refine the design of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium. | |
| HS-PS1-7 | Use mathematical representations to support the claim that atoms, and therefore mass, are conserved during a chemical reaction. | |
| HS-PS1-8 | Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and radioactive decay. | |
| HS-PS2 | | |
| HS-PS2-1 | Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration. | |
| HS-PS2-2 | Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system. | |
| HS-PS2-3 | Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision. | |
| HS-PS2-4 | Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects. | |

| HS-PS2-5 | Plan and conduct an investigation to provide evidence that an electric current can produce a magnetic field and that a changing magnetic field can produce an electric current. | |
|----------------|--|--|
| HS-PS2-6 | Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials. | |
| HS-PS3 | | |
| HS-PS3-1 | Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known | |
| HS-PS3-2 | Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative position of particles (objects). | |
| HS-PS3-3 | Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy. | |
| HS-PS3-4 | Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperatures are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics). | |
| HS-PS3-5 | Develop and use a model of two objects interacting through electric or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction. | |
| HS-PS4 | | |
| HS-PS4-1 | Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media. | |
| HS-PS4-2 | Evaluate questions about the advantages of using a digital transmission and storage of information. | |
| HS-PS4-3 | Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other. | |
| HS-PS4-4 | Evaluate the validity and reliability of claims in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter. | |
| HS-PS4-5 | Communicate technical information about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy. | |
| ETS Engineerin | ng Design | |
| HS-ETS1-1 | Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants. | |

| HS-ETS1-2 | Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering. |
|-----------|---|
| HS-ETS1-3 | Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts. |
| HS-ETS1-4 | Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem. |

English Companion Standards

List grade-level appropriate companion standards for <u>History, Social Studies, Science and Technical Subjects</u> (CTE/Arts) 6-12. English Companion Standards are <u>required</u> in these subject/content areas.

| Unit Addressed | Standard # | Standard Description |
|----------------|-------------|---|
| 1,2,3,4,5,6,7 | RST.11-12.1 | Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (HS-PS2-1),(HS-PS2-6)) |
| 1,2,3,4,5,6,7 | RST.11-12.7 | Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem. (HS-PS2-1 |
| 3,4,5,6,7 | RST.11-12.8 | Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information. (HS-PS4-2),(HS-PS4-3),(HS-PS4-4) |
| 2,3,4,5,6,7 | WHST.9-12.2 | Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. (HS-PS2-6) |
| 2,3,4,5,6,7 | WHST.9-12.5 | Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience. (HS-PS1-2) |
| 3,4,5,6,7 | WHST.9-12.7 | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. (HS-PS2-3),(HSPS2-5) |

| 2,4,5 | WHST.11-12. 8 | Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation. (HS-PS2-5) |
|---------------|------------------|--|
| 1,2,3,4,5,6,7 | WHST.9-12.9 | Draw evidence from informational texts to support analysis, reflection, and research. (HS-PS2-1),(HS-PS2-5) |
| 2,3,4,5 | SL.11-12.5 | Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest. (HS-PS3-1),(HS-PS3-2),(HS-PS3-5) |

Career Awareness, Exploration, Preparation, and Training (Standard 9.2)

List appropriate units below for which standards will be addressed

| By Grade 12 | | |
|-----------------------|---|--|
| Unit Addressed | Core Idea | Standard / Description |
| 3,4,5,6 | There are strategies to improve one's professional value and marketability. | 9.2.12.CAP.1: Analyze unemployment rates for workers with different levels of education and how the economic, social, and political conditions of a time period are affected by a recession. 9.2.12.CAP.2: Develop college and career readiness skills by participating in opportunities such as structured learning experiences, apprenticeships, and dual enrollment programs. 9.2.12.CAP.3: Investigate how continuing education contributes to one's career and personal growth. |
| 1,2,3,4,5,6,7 | Career planning requires purposeful planning based on research, self-knowledge, and informed choices. | 9.2.12.CAP.4: Evaluate different careers and develop various plans (e.g., costs of public, private, training schools) and timetables for achieving them, including educational/training requirements, costs, loans, and debt repayment. 9.2.12.CAP.5: Assess and modify a personal plan to support current interests and postsecondary plans. |

| | | 9.2.12.CAP.6: Identify transferable skills in career choices and design alternative career plans based on those skills. 9.2.12.CAP.7: Use online resources to examine licensing, certification, and credentialing requirements at the local, state, and national levels to maintain compliance with industry requirements in areas of career interest. 9.2.12.CAP.8: Determine job entrance criteria (e.g., education credentials, math/writing/reading comprehension tests, drug tests) used by employers in various industry sectors. 9.2.12.CAP.9: Locate information on working papers, what is required to obtain them, and who must sign them. 9.2.12.CAP.10: Identify strategies for reducing overall costs of postsecondary education (e.g., tuition assistance, loans, grants, scholarships, and student loans). 9.2.12.CAP.11: Demonstrate an understanding of Free Application for Federal Student Aid (FAFSA) requirements to apply for postsecondary education. |
|---------|---|--|
| 3,4,5,6 | An individual's income and benefit needs and financial plan can change over time. | 9.2.12.CAP.12: Explain how compulsory government programs (e.g., Social Security, Medicare) provide insurance against some loss of income and benefits to eligible recipients. 9.2.12.CAP.13: Analyze how the economic, social, and political conditions of a time period can affect the labor market. |
| 3,4,5,6 | Securing an income involves an understanding of the costs and time in preparing for a career field, interview and negotiation skills, job searches, resume development, prior experience, and vesting and retirement plans. | 9.2.12.CAP.14: Analyze and critique various sources of income and available resources (e.g., financial assets, property, and transfer payments) and how they may substitute for earned income. |
| | Understanding income involves an analysis of payroll taxes, deductions and earned benefits. | 9.2.12.CAP.15: Demonstrate how exemptions, deductions, and deferred income (e.g., retirement or medical) can reduce taxable income. 9.2.12.CAP.16: Explain why taxes are withheld from income and the relationship of federal, state, and local taxes (e.g., property, income, excise, and sales) and how the money collected is used by local, county, state, and federal governments. |

| | | 9.2.12.CAP.17: Analyze the impact of the collective bargaining process on benefits, income, and fair labor practice. 9.2.12.CAP.18: Differentiate between taxable and nontaxable income from various forms of employment (e.g., cash business, tips, tax filing and withholding). 9.2.12.CAP.19: Explain the purpose of payroll deductions and why fees for various benefits (e.g., medical benefits) are taken out of pay, including the cost of employee benefits to employers and self-employment income. 9.2.12.CAP.20: Analyze a Federal and State Income Tax Return. |
|---------|--|--|
| 3,4,5,6 | There are ways to assess a business's feasibility and risk and to align it with an individual's financial goals. | 9.2.12.CAP.21: Explain low-cost and low-risk ways to start a business. 9.2.12.CAP.22: Compare risk and reward potential and use the comparison to decide whether starting a business is feasible. 9.2.12.CAP.23: Identify different ways to obtain capital for starting a business |

Life Literacies and Key Skills (Standard 9.4)

List appropriate units below for which standards will be addressed

| By Grade 12 | | |
|-----------------------|---|---|
| Unit Addressed | Core Idea | Standard / Description |
| 1,2,3,4,5,6,7 | Creativity and Innovation: With a growth mindset, failure is an important part of success. | 9.4.12.CI.1: Demonstrate the ability to reflect, analyze, and use creative skills and ideas (e.g., 1.1.12prof.CR3a). |
| 1,2,3,4,5,6,7 | Creativity and Innovation: Innovative ideas or innovation can lead to career opportunities. | 9.4.12.CI.2: Identify career pathways that highlight personal talents, skills, and abilities (e.g., 1.4.12prof.CR2b, 2.2.12.LF.8). 9.4.12.CI.3: Investigate new challenges and opportunities for personal growth, advancement, and transition (e.g., 2.1.12.PGD.1). |

| 1,2,3,4,5,6,7 | Critical Thinking and Problem-solving: Collaboration with individuals with diverse experiences can aid in the problem-solving process, particularly for global issues where diverse solutions are needed. | 9.4.12.CT.1: Identify problem-solving strategies used in the development of an innovative product or practice (e.g., 1.1.12acc.C1b, 2.2.12.PF.3). 9.4.12.CT.2: Explain the potential benefits of collaborating to enhance critical thinking and problem solving (e.g., 1.3E.12profCR3.a). 9.4.12.CT.3: Enlist input from a variety of stakeholders (e.g., community members, experts in the field) to design a service learning activity that addresses a local or global issue (e.g., environmental justice). 9.4.12.CT.4: Participate in online strategy and planning sessions for course-based, school-based, or other projects and determine the strategies that contribute to effective outcomes. |
|---------------|---|--|
| 1,2,3,4,5,6,7 | Digital Citizenship: Laws govern the use of intellectual property and there are legal consequences to utilizing or sharing another's original works without permission or appropriate credit. | 9.4.12.DC.1: Explain the beneficial and harmful effects that intellectual property laws can have on the creation and sharing of content (e.g., 6.1.12.CivicsPR.16.a). 9.4.12.DC.2: Compare and contrast international differences in copyright laws and ethics |
| 1,2,3,4,5,6,7 | Digital Citizenship: Laws govern many aspects of computing, such as privacy, data, property, information, and identity. These laws can have beneficial and harmful effects, such as expediting or delaying advancements in computing and protecting or infringing upon people's rights. | 9.4.12.DC.3: Evaluate the social and economic implications of privacy in the context of safety, law, or ethics (e.g., 6.3.12.HistoryCA.1). 9.4.12.DC.4: Explain the privacy concerns related to the collection of data (e.g., cookies) and generation of data through automated processes that may not be evident to users (e.g., 8.1.12.NI.3). 9.4.12.DC.5: Debate laws and regulations that impact the development and use of software. |
| 1,2,3,4,5,6,7 | Digital Citizenship: Cultivating online reputations for employers and academia requires separating private and professional digital identities. | 9.4.12.DC.6: Select information to post online that positively impacts personal image and future college and career opportunities. |

| 1,2,3,4,5,6,7 | Digital Citizenship: Digital communities influence many aspects of society, especially the workforce. The increased connectivity between people in different cultures and different career fields have changed the nature, content, and responsibilities of many careers. | 9.4.12.DC.7: Evaluate the influence of digital communities on the nature, content and responsibilities of careers, and other aspects of society (e.g., 6.1.12.CivicsPD.16.a). |
|---------------|--|--|
| 1,2,4,5 | Digital Citizenship: Network connectivity and computing capability extended to objects, sensors and everyday items not normally considered computers allows these devices to generate, exchange, and consume data with minimal human intervention. Technologies such as Artificial Intelligence (AI) and blockchain can help minimize the effect of climate change. | 9.4.12.DC.8: Explain how increased network connectivity and computing capabilities of everyday objects allow for innovative technological approaches to climate protection. |
| 1,2,3,4,5,6,7 | Global and Cultural Awareness: Solutions to the problems faced by a global society require the contribution of individuals with different points of view and experiences. | 9.4.12.GCA.1: Collaborate with individuals to analyze a variety of potential solutions to climate change effects and determine why some solutions (e.g., political. economic, cultural) may work better than others (e.g., SL.11-12.1., HS-ETS1-1, HS-ETS1-2, HS-ETS1-4, 6.3.12.GeoGI.1, 7.1.IH.IPERS.6, 7.1.IL.IPERS.7, 8.2.12.ETW.3). |
| 3,4,5 | Information and Media Literacy: Advanced search techniques can be used with digital and media resources to locate information and to check the credibility and the expertise of sources to answer questions, solve problems, and inform the decision-making. | 9.4.12.IML.1: Compare search browsers and recognize features that allow for filtering of information. 9.4.12.IML.2: Evaluate digital sources for timeliness, accuracy, perspective, credibility of the source, and relevance of information, in media, data, or other resources (e.g., NJSLSA.W8, Social Studies Practice: Gathering and Evaluating Sources. |

| 1,2,3,4,5,6,7 | Information and Media Literacy: Digital tools such as artificial intelligence, image enhancement and analysis, and sophisticated computer modeling and simulation create new types of information that may have profound effects on society. These new types of information must be evaluated carefully | 9.4.12.IML.3: Analyze data using tools and models to make valid and reliable claims, or to determine optimal design solutions (e.g., S-ID.B.6a., 8.1.12.DA.5, 7.1.IH.IPRET.8) 9.4.12.IML.4: Assess and critique the appropriateness and impact of existing data visualizations for an intended audience (e.g., S-ID.B.6b, HS-LS2-4). |
|---------------|---|--|
| 3,4,5 | Information and Media Literacy: In order for members of our society to participate productively, information needs to be shared accurately and ethically. | 9.4.12.IML.5: Evaluate, synthesize, and apply information on climate change from various sources appropriately (e.g., 2.1.12.CHSS.6, S.IC.B.4, S.IC.B.6, 8.1.12.DA.1, 6.1.12.GeoHE.14.a, 7.1.AL.PRSNT.2). 9.4.12.IML.6: Use various types of media to produce and store information on climate change for different purposes and audiences with sensitivity to cultural, gender, and age diversity (e.g., NJSLSA.SL5). |
| 3,4,5 | Information and Media Literacy: Accurate information may help in making valuable and ethical choices. | 9.4.12.IML.7: Develop an argument to support a claim regarding a current workplace or societal/ethical issue such as climate change (e.g., NJSLSA.W1, 7.1.AL.PRSNT.4). |
| 3,4,5 | Information and Media Literacy: Media have embedded values and points of view. | 9.4.12.IML.8: Evaluate media sources for point of view, bias, and motivations (e.g., NJSLSA.R6, 7.1.AL.IPRET.6). 9.4.12.IML.9: Analyze the decisions creators make to reveal explicit and implicit messages within information and media (e.g., 1.5.12acc.C2a, 7.1.IL.IPRET.4). |
| 1,2,3,4,5,6,7 | Technology Literacy: Digital tools differ in features, capacities, and styles. Knowledge of different digital tools is helpful in selecting the best tool for a given task. | 9.4.12.TL.1: Assess digital tools based on features such as accessibility options, capacities, and utility for accomplishing a specific task (e.g., W.11-12.6.). 9.4.12.TL.2: Generate data using formula-based calculations in a spreadsheet and draw conclusions about the data. |

| 1,2,3,4,5,6,7 | Technology Literacy: Collaborative digital tools can be used to access, record and share different viewpoints and to collect and tabulate the views of groups of people. | 9.4.12.TL.3: Analyze the effectiveness of the process and quality of collaborative environments. 9.4.12.TL.4: Collaborate in online learning communities or social networks or virtual worlds to analyze and propose a resolution to a real-world problem (e.g., 7.1.AL.IPERS.6). |
|---------------|--|---|
|---------------|--|---|

Interdisciplinary Connections (2020 NJSLS)

List any other content standards addressed as well as appropriate units. All arts integration connections may be listed within this chart.

Visual & Performing Arts Integration (Standard 1)

List appropriate units below for which standards (1.1 through 1.5) <u>may be addressed</u>

| Unit Addressed | Artistic Process | Anchor Standard |
|----------------|---|--|
| 1,2,3,4,5,6,7 | Creating | Anchor Standard 1: Generating and conceptualizing ideas. Anchor Standard 2: Organizing and developing ideas. Anchor Standard 3: Refining and completing products. |
| 3,4,5 | Connecting | Anchor Standard 10: Synthesizing and relating knowledge and personal experiences to create products. Anchor Standard 11: Relating artistic ideas and works within societal, cultural, and historical contexts to deepen understanding. |
| 1,2,3,4,5,6,7 | Performing/ Presenting/ Producing | Anchor Standard 4: Selecting, analyzing, and interpreting work. Anchor Standard 5: Developing and refining techniques and models or steps needed to create products. Anchor Standard 6: Conveying meaning through art. |
| 3,4,5 | Responding | Anchor Standard 7: Perceiving and analyzing products. Anchor Standard 8: Applying criteria to evaluate products. Anchor Standard 9: Interpreting intent and meaning. |

Other Interdisciplinary Content Standards

List appropriate units below for any other content/standards that <u>may be addressed</u>

| Unit Addressed | Content / Standard # | Standard Description |
|-----------------------|----------------------|---|
| 1,2,3,4,5,6,7 | Math / MP.2 | Reason abstractly and quantitatively. (HS-PS1-5),(HS-PS1-7) |
| 1,2,3,4,5,6,7 | Math / MP.4 | Model with mathematics. (HS-PS1-4),(HS-PS1-8) |

| 1,2,3,4,5,6,7 | Math / HSN-Q.A.1 | Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. (HS-PS1-2),(HS-PS1-3),(HS-PS1-4),(HS-PS1-5),(HS-PS1-7),(HS-PS1-8) |
|---------------|--------------------|--|
| 1,2,3,4,5,6,7 | Math / HSN-Q.A.2 | Define appropriate quantities for the purpose of descriptive modeling. (HS-PS1-4),(HS-PS1-7),(HS-PS1-8) |
| 1,2,3,4,5,6,7 | Math / HSN-Q.A.3 | Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. (HS-PS1-2),(HS-PS1-3),(HS-PS1-4),(HS-PS1-5),(HS-PS1-7),(HS-PS1-8) |
| 1,2,3,4,5,6,7 | Math / HSA-SSE.A.1 | Interpret expressions that represent a quantity in terms of its context. (HS-PS2-1),(HS-PS2-4) |
| 1,2,3,4,5,6,7 | Math / HSA-SSE.B.3 | Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression. (HS-PS2-1),(HS-PS2-4) |
| 1,2,3,4,5,6,7 | Math / HSA-CED.A.1 | Create equations and inequalities in one variable and use them to solve problems. (HS-PS2-1),(HS-PS2-2) |
| 1,2,3,4,5,6,7 | Math / HSA-CED.A.2 | Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. (HS-PS2-1),(HS-PS2-2) |
| 1,2,3,4,5,6,7 | Math / HSA-CED.A.4 | Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. (HS-PS2-1),(HS-PS2-2) |
| 1,2,3,4,5,6,7 | Math / HSF-IF.C.7 | Graph functions expressed symbolically and show key features of the graph, by in hand in simple cases and using technology for more complicated cases. (HS-PS2-1) |
| 1,2,3,4,5,6,7 | Math / HSS-ID.A.1 | Represent data with plots on the real number line (dot plots, histograms, and box plots). (HS-PS2-1) |

| Unit/ Topic | Month (w/Approx number of Teaching Days) |
|--|--|
| Unit 1: Kinematics One-Dimensional Motion Motion of an object can be described in terms of position, velocity and acceleration. | September (~19 days) |
| Graphical Analysis Construct and interpret graphs of motion. Two-Dimensional Motion Motion in horizontal and vertical directions are independent of each other. Unit 2: Dynamics (Newton's Laws of Motion and Forces) Students develop an understanding of the foundational principles of dynamics. Explore the implications of mass' intrinsic property of Inertia. | October (~19 days) |
| Acceleration can be predicted by Newton's Second Law of Motion. Identify action-reaction forces in accordance with Newton's Third Law. Unit 3: Universal Gravitation (Including Circular Motion) A gravitational field at the location of an object causes a gravitational force on the object. The gravitational force or field changes as the reference position changes. | November (~16 days) |
| Unit 4: Energy Forces can do work to add or remove energy from a system. Energy can change from one form to another within a system. Use conservation laws to determine type and amount of energy for an object in different situations. Unit 5: Momentum Change in momentum is due to a net force acting on the object Linear momentum is conserved for an object or system if the net external force is zero | December (~15 days) |
| Differentiate between situations in which it is appropriate to apply conservation of momentum and/or conservation of energy. Unit 6: Rotational Motion Rotating objects can have rotational energy and angular momentum Utilize rotational energy to discuss changes to an object's motion when rotating instead | January (~18 days) |
| of, or in addition to, sliding. | February (~18 days) |
| Unit 7: Simple Harmonic Motion Restoring forces result in oscillatory motion. Predict where the maximum and minimum speed, acc, KE, PE will occur for SHM. | |
| | March (~15-20 days) |

| Unit 7 Continuted | |
|---|------------------------|
| Review for AP Test | April (~15-20 days) |
| Practice Tests Projects and Additional Topics | May (~18 days) |
| Projects and Additional Topics | June (~15 days) |

Units Scope and Sequence

Unit1: Kinematics

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Motion of an object can be described in terms of position, velocity and acceleration.
- When an object is in free fall the equations of kinematics can describe its motion.
- Motion in horizontal and vertical directions are independent of each other.
- Some quantities are vectors and must be added as such.

Learning Objectives

- Work with scalar and vector quantities
- Define kinematics variables
- Derive equations of kinematics
- Solve problems using equations of kinematics in both one and two dimensions
- Recognize and solve free fall problems
- Construct and interpret graphs of motion

Unit 2: Dynamics

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Objects and systems have properties such as mass
- Fields existing in space can be used to explain interactions
- Acceleration can be predicted by Newton's Second Law
- Certain types of forces are considered fundamental

Learning Objectives

- Identify forces and make free-body-diagrams
- Identify action-reaction forces in accordance with Newton's Third Law
- Assess the type of motion a body will experience based on the free-body-diagram
- Apply Newtonian principles to both single-bodied as well as muli-bodied systems
- Explain how Newton's First Law applies to various situations
- Identify the centripetal force for objects in uniform circular motion
- Apply Newton's Second Law for situations where the object is in circular motion

Unit 3: Universal Gravitation

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

HS-PS2-4. Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects.

HS-ETS1-4. Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- A gravitational field at the location of an object causes a gravitational force on the object
- Gravitation is governed by and inverse square law
- Gravitational forces and fields are due to mass
- Gravitational forces and fields are vectors and must be treated as such

Learning Objectives

- Describe the gravitational force or field at a location due to given masses
- Calculate the gravitational force or field due to several masses in various arrangements
- Explain how the gravitational force or field changes as the reference position changes
- Calculate speed or period of a satellite starting with gravitation as the centripetal force

Unit 4: Work & Energy

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

HS-PS3-1. Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.

HS-PS3-2. Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative position of particles (objects).

HS-PS3-3. Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Forces can do work to add or remove energy from a system
- Energy exists in different forms and is constant throughout the universe
- Energy can change from one form to another within a system
- Power is the rate of energy transfer into, out of, or within a system

Learning Objectives

- Describe the different common forms of energy
- Calculate kinetic, potential, and changes in energy
- Use conservation laws to determine type and amount of energy for an object in different situations
- Determine the power utilized in a system and use it to describe the system
- Apply energy laws to real-world scenarios

Unit 5: Momentum

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

HS-PS2-2. Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.

HS-PS2-3. Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.

HS-PS3-1. Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Kev Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Change in momentum is due to a net force acting on the object
- Both mass and velocity affect momentum linearly
- Linear momentum is conserved for an object or system if the net external force is zero
- Impulse is equivalent to the change in momentum

Learning Objectives

- Determine in what situations an impulse is acting on an object
- Calculate the impulse and/or the change in momentum and realize they are equivalent
- Analyze one dimensional elastic and inelastic collisions and solve for an unknown
- Analyze two dimensional elastic and inelastic collisions and solve for an unknown
- Calculate the power supplied by various forces in various situations
- Read and interpret force vs. time graphs and use the graph to solve for an unknown
- Analyze the energy in a collision
- Differentiate between situations in which it is appropriate to apply conservation of momentum and/or conservation of energy.

Unit 6: Rotation

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

HS-PS2-4. Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Objects can travel along a linear path or rotate around an axis
- Rotational measurements are based on angles and can be related to linear measurements
- Rotating objects can have rotational energy and angular momentum different from linear
- Conservation laws still apply, but must be expanded to include rotation as well
- Torque occurs when forces are applied to an object away from its center of mass and will cause rotation

Learning Objectives

- Determine the net torque on an object and how it will affect that object's motion
- Predict the behavior of rotational collisions
- Utilize rotational energy to discuss changes to an object's motion when rotating instead of, or in addition to, sliding

Unit 7: Simple Harmonic Motion

Learning Goals: What do I want my students to learn?

Standards

NJSLS -

HS-PS2-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

HS-PS4-1. Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.

NJSLS - Career Awareness, Exploration, Preparation, and Training

NJSLS - Life Literacies and Key Skills

NJSLS - Interdisciplinary Standards

Fundamental Concepts / Big Ideas

- Restoring forces result in oscillatory motion
- Linear restoring forces result in simple harmonic motion
- Mechanical energy is conserved when only conservative forces act

Learning Objectives

Students will be able to...

- Calculate the period of a simple pendulum, physical pendulum, and mass on a spring
- Describe energy transformations during one period of SHM
- Predict where the maximum and minimum speed, acc, KE, PE will occur for SHM

Please contact the Content Supervisor for any questions.
